

## § 19.24

other port where credit is to be applied. Such withdrawals shall designate the plant or plants which are to receive the credit, shall specify the warehouse entry number or numbers to which the credit is to be applied, and shall state the quantity of dutiable metal which is to be applied to each warehouse entry specified, and when any of the credits specified represent the last withdrawal against a particular warehouse entry, the words "final withdrawal" shall be shown on the withdrawal. When two or more plants nearest a given port are designated to receive credit, sufficient copies of the withdrawals shall be prepared to cover each such plant and entry. If at the time of withdrawal the warehouse proprietor does not know the plants or warehouse entry numbers which are to be credited with the withdrawal, or the metallic content of the dutiable metal being exported, the preparation of the before-mentioned copies of Customs Form 7512 may be postponed for a period of not longer than 30 days from the date of the movement of the dutiable metal from the plant. In such cases, a so-called memorandum withdrawal, in the number of copies provided for in §144.37 of this chapter, may be used in the first instance for the purpose of obtaining the required Customs record of the exportation of the dutiable metal under Customs supervision. All memorandum withdrawals shall be conspicuously endorsed "Memorandum Withdrawal."

## § 19.24 Theoretical transfer without physical shipment of dutiable metal.

(a) Transfer may be made from one port of entry to another by a withdrawal for transportation and rewarehouse executed in regular form without physical shipment of the metal, provided enough like metal in any form is on hand at the establishment to which the theoretical transfer is made to satisfy the new bond obligations.

(b) The wastage allowance established for the plant from which the original withdrawal for transportation was made shall be shown on the transfer withdrawal and set up as a part of

## 19 CFR Ch. I (4-1-11 Edition)

the charge against the bond at the plant to which the metal was theoretically transferred. Such wastage shall govern and be the basis for allowance when metal is withdrawn from the plant where the theoretical rewarehousing was affected.

## § 19.25 Credit to be applied under various forms of withdrawals.

(a) The warehouse entry account of the plant designated in the withdrawal to receive credit for the exportation shall be credited with the following:

(1) The quantity of dutiable metal exported.

(2) The wastage in effect on the date of entry at the plant of initial treatment of such materials.

(3) The proportion of any other dutiable metals in the importation being credited which were lost at the said plant in the production of a quantity of dutiable metal equal to that exported.

(b) If credit is being applied to a charge set up by a theoretical transfer under §19.24 at the plant designated in the withdrawal to receive the credit, the wastages to be applied shall be those set up at such plant in connection with the theoretical transfer, irrespective of the date of the withdrawal.

(c) On the transfer of dutiable metal to a bonded storage warehouse, credit shall be applied at the plant designated in the withdrawal to receive the credit in the manner provided for in paragraph (a) of this section with respect to withdrawals for exportation. The charge so credited at the plant shall be set up on the warehouse entry account of the storage warehouse to which the dutiable metal has been transferred. In the case of the withdrawal of dutiable metal for transfer to a bonded manufacturing warehouse, credit shall be applied in the same manner at the plant designated in the withdrawal to receive the credit, but the charge set upon the warehouse entry account of the bonded manufacturing warehouse shall be limited to the quantity of dutiable metal transferred to such warehouse.
